

**IN THE CLAIMS:**

Please cancel claims 2-5, 8 and 12-14 without prejudice to or disclaimer of the subject matter recited therein.

Please amend claims 6, 7 and 9 as follows:

**LISTING OF CURRENT CLAIMS**

Claim 1. (Canceled)

Claims 2-5. (Canceled)

Claim 6. (Currently Amended) ~~The thin-layer bubble blower as claimed in claim 13;~~ A thin-layer bubble blower comprising:

a) a container having:

i) two flat cover plates connected together;

5 ii) a flat liquid chamber formed between the two flat cover plates and containing a bubble solution therein; and

iii) an opening,

wherein the container has a thickness between 2 and 6 mm; and

10 b) a bubble-blowing bar removably inserted into the flat liquid chamber through the opening for blowing the bubble solution into bubbles,

wherein said container is shaped like a rule and has marks for measuring a distance.

Claim 7. (Currently Amended) ~~The thin-layer bubble blower as claimed in claim 13;~~ A thin-layer bubble blower comprising:

- 5           a) a container having:
- i) two flat cover plates connected together;
- ii) a flat liquid chamber formed between the two flat cover plates  
                    and containing a bubble solution therein; and
- iii) an opening,
- wherein the container has a thickness between 2 and 6 mm; and
- 10          b) a bubble-blowing bar removably inserted into the flat liquid chamber  
                    through the opening for blowing the bubble solution into bubbles,  
                    wherein said container has one side fixedly mounted with a folding  
                    sheet member.

Claim 8. (Canceled)

Claim 9. (Currently Amended) ~~The thin-layer bubble blower as claimed in claim 13;~~ A thin-layer bubble blower comprising:

- 5           a) a container having:
- i) two flat cover plates connected together;
- ii) a flat liquid chamber formed between the two flat cover plates  
                    and containing a bubble solution therein; and
- iii) an opening,
- wherein the container has a thickness between 2 and 6 mm; and
- 10          b) a bubble-blowing bar removably inserted into the flat liquid chamber  
                    through the opening for blowing the bubble solution into bubbles,  
                    wherein said container further comprises a plurality of ribs located  
                    inside said flat liquid chamber and forming with said flat liquid chamber  
                    a labyrinth, and floating elements floating in said bubble solution inside  
                    said flat liquid chamber.

Claims 10-14. (Canceled).
